

TensionCamApp: Definition of Done

To be marked as “finished”, every story **MUST** (if applicable):

- Have been tested manually on an actual Android device
- Include relevant documentation
- Include relevant tests
- Include functional and runnable code
- Meet the requirements specified in the story

To be marked as “finished”, every story **SHOULD**:

- Include code that is optimized for the application in question
- Include code that adhere to the Code Conventions for the Java Programming Language

Notes:

- A completed user story that results in an unexpected bug **in another feature** should still be considered done. However, a new bug story should be filed.
